Name: 12th CBSE-A-Mathematics

Instructions

There are 3 Videos and 7 Questions in this Homework

Due Date No. of Videos No. of Questions 11th April 2022 3 Videos 7 Questions

How much energy is released or absorbed when 1 $\,$ of steam at 100 $\,$ °C turns to ice at 0 $\,$ °C?

How do you appreciate the role of the higher specific heat of water in stabilizing atmosphere temperature during winter and summer seasons?

_____ is used as a coolant.

Is used as a coolant.

Specific heat S=

The SI unit of specific heat is

Suppose that 1 l of water is heated for a certain time to rise and its temperature by 2 °C. If 2 l of water is heated for the same time, by how much will its temperature rise in °C?

How much energy is transferred when l gm of boiling water at 100 °C cools to water at 0 °C? Specific heat = l cal gm-1 °C-1 and latent heat 540 cal gm-1.

Explain the procedure of finding specific heat of solid experimentally?

What role does specific heat play in keeping a watermelon cool for a long time after removing it from a fridge on a hot day?
